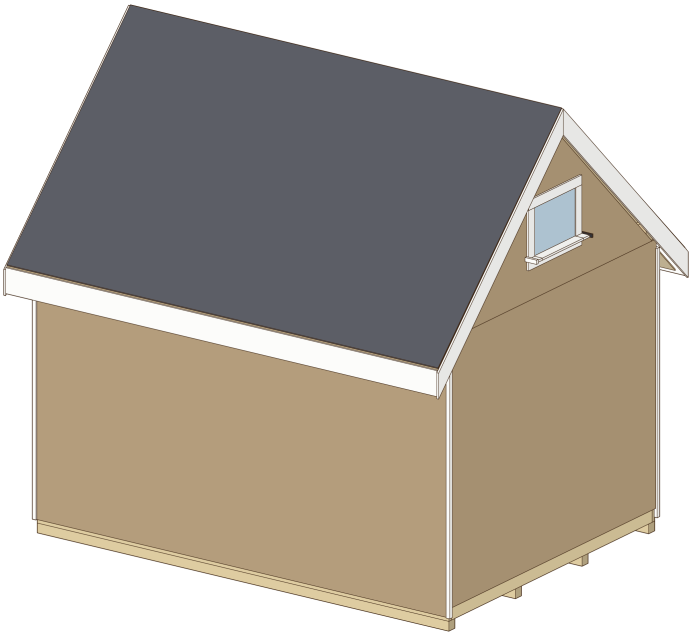
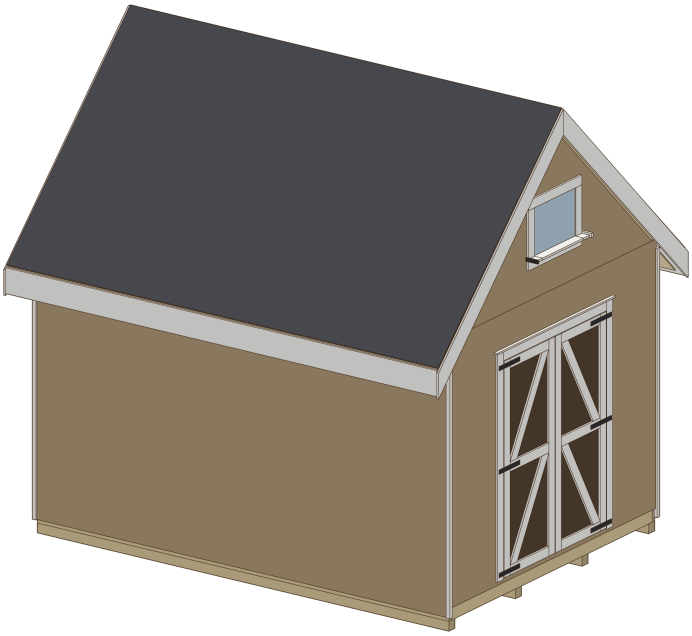
Before you start

Shed rules (size limits, height, setbacks, permits) vary by town and HOA. Check your local permit office before you build.

Safety: wear eye and ear protection, keep blades sharp and guards on, work from stable ladders with a helper, and stay off open rafters.

This free version walks through the five stages of the 10x14 gable shed with loft plan with views from the full plan. Below: the finished shed from the front and from the back.

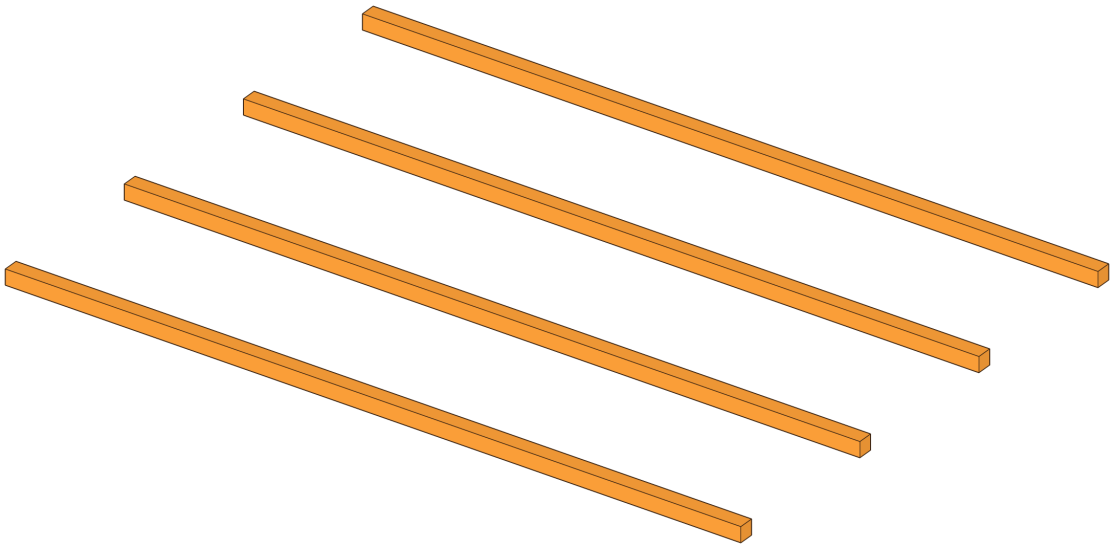




Full 10x14 shed with loft plan: material list, cut list, every measurement | $24.99 | 3dshedplans.com/10x14-shed-with-loft-plan/

1 SITE AND FOUNDATION

Clear and level the site, lay a compacted gravel pad inside a pressure-treated 4x6 frame and set the pressure-treated 4x4 skids level in both directions.



2 FLOOR FRAME AND DECK

Build the floor frame from pressure-treated 2x6 rim joists and joists about 15 1/4 in on center, square it, fix it to the skids, and glue and screw 3/4 in tongue and groove plywood on top.

In the full plan: the site layout with its diagonals, skid spacing, the joist marks on the rims and a piece map for every decking sheet. www.3dshedplans.com/10x14-shed-with-loft-plan/

3 WALLS

Frame each wall with 2x4 studs 16 in on center or closer and a header over the door. Square it, raise it as a bare frame with a helper, brace it plumb, and tie the walls together with the second top plates. Once all four walls stand, hang the T1-11 siding and build the double door from T1-11 with a 1x4 frame and two Z braces on each leaf, then hang it on T-strap hinges inside a 1x4 casing.

In the full plan: every wall drawn stud by stud with a position table, the door header, the siding sheet layouts, the door leaf with its frame and brace cuts and how to raise each wall safely.

4 ROOF

Cut a pattern 2x6 rafter for the steep 12/12 roof, set the ridge board and the rafter pairs about 15 1/4 in on center, then the rafter ties, ridge straps and gable end studs, and the rake overhang on lookout blocks. The storage loft over the right end goes in with the roof: loft joists on the wall plates, a 3/4 in plywood deck, a storage rail along the open edge and a fixed loft ladder. Then sheath with OSB and add felt, drip edge and shingles, with cap shingles along the ridge.

In the full plan: the pattern rafter with every cut, the rafter layout on the plates, the sheathing map and the shingle courses. www.3dshedplans.com/10x14-shed-with-loft-plan/

5 TRIM AND PAINT

Add the corner trim and the drip cap over the door, then prime and paint or stain.

In the full plan: the casing and trim table, the drip caps and the corner trim.
