## 1 BASIC OVERVIEW AND DIMENSIONS

This 12x18 lean-to shed is extremely spacious yet attractive enough to add the much needed glamor to your garden. You can store your gardening supplies as well spend your leisure hours performing your hobbies. The shed has a width of 12 feet from the bottom and 12 feet and 7 inches from the top plate from the front. From the sides, the shed has a width of 18 feet from the bottom and 18 feet and 1 inch from the top. The shed has two windows on the side and one huge garage door on the front.

### NOTE

Professional tip section is only available in PREMIUM (full) version of the plan.

## 2 FOUNDATION AND FLOOR

Building a solid foundation is crucial to the health of the entire shed since it will be holding up all the walls and the roof. Use pressure treated timber to create joists and skids for creating an 18 feet wide and 12 feet deep foundation. Use 3.5 inches galvanized nails to attach the parts together. Once you have built the foundation, you need to use  $\frac{3}{4}$  inches tongue and groove plywood to build the flooring.

FOUNDATION BASE

FLOOR

### NOTE

Professional tip section is only available in PREMIUM (full) version of the plan.

### 3 WALL STRUCTURES

Once the foundation and the floor is built, you will start working on the right and left walls. Both the walls will have a width of 18 feet from the bottom plates. The right wall will have a height of 7 feet and 7 1/2 inches while the left wall will have a height of 6 feet and 7 1/2 inches. Use pressure treated timber to build the joists and skids for the walls.

#### NOTE

Professional tip section is only available in PREMIUM (full) version of the plan.

## 4 WALL STRUCTURES

After building the right and left walls, you will start working on the front and back walls. The width of both the walls should be 11 feet and 5 1/2 inches while the height should be 6 feet and 7 1/2 inches. Use pressure treated timber to build the skids and joists for the walls and nail them together using 3.5 inches galvanized nails.

### NOTE

Professional tip section is only available in PREMIUM (full) version of the plan.

## 5 ROOF SECTION

Finally, you will start working on the roofing of the shed. You will build a base with rafters of 18 feet width and 12 feet and 7 inch depth. Start installing asphalt shingles once you are done building and installing the base.

### NOTE

Professional tip section is only available in PREMIUM (full) version of the plan.
